## PRODUCT SPECIFICATION

### GMO AND IRRADIATION INFORMATION:

- The product is not sulfured and no flavors are added. During processing, treatment and storage it was not treated with any ionizing radiation.
- The product and the packaging material conform to the applicable German and European Food and Packaging Law in the recent version.
- The product is not processed from GMO nor does it contain GMO according to EG regulation 1829/2003. Marking "genetically modified" is not required

### Reference

The addition of binders is to be abstained from the production process is traditional and gentle. Therefore, temperatures below 18°C may lead to phase formation. That is the solid coconut ingredients are deposited in the upper part of the packing which remains as liquid in the refrigerated condition. This is not a sign of spoilage. It's rather a natural process in which the fatty ingredients separate from the water soluble components. By shaking gently, the drinking coconut milk can be quickly and easily returned into normal state.
